

# Tin Can Alley

You will need:

- 10 empty tin cans
- 10 strips of paper
- Sellotape
- A soft ball

Once you have collected your tin cans, decorate 10 strips of paper however you like. We added swirls, hearts, flowers and people to our drawings! You could also add glitter or paint – get creative!

Draw the numbers 1-10 on your pieces of paper and stick one piece of paper to each tin can.

Stack them up to form a triangle shape and get ready to roll the ball!

See how many you can knock down in one go.

Put these to one side and add up your score.

Eg. We knocked down number 4, 1, 2 and 7 so added these together to get 14.

Try again and see how many you can knock down in one go!
