

Role Play Coffee Shop

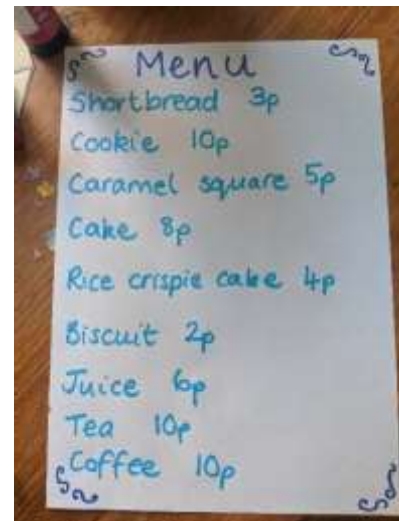

At Beaucroft, we love to visit coffee shops, the RAFA café and Bistro café at Post 16

– why not open your own café?

You can make your own cakes and serve drinks. Have a look through the cupboard and make your own menu of items to choose from in your café. →

← We chose to price our items at under 10p each so that we could use 1p coins – that way, it doesn't get too confusing when counting what each coin is worth. If your child is more advanced in counting or using money, change up the prices to practice using different coins!

Set your table up, café style! We used the coffee table as it was at a more child-friendly height. What might you need in a coffee shop? ↓

Plates and napkins, maybe a knife and fork for eating your cake? Make a jug of juice or water and get some cups. They can practice pouring their own drinks or cutting their cake in half – you could use this as an opportunity to cut cakes in half or into quarters. Count how many pieces of cake you have.

Get a notepad for taking orders, if you have PECS to hand, use these instead of writing or alongside writing. Take turns to serve each other and to bring your order over.

Enjoy your coffee shop!
